Attention: Jamie Shand

Dear Mr. Shand:

Re: Trans Mountain Pump Station Expansion Project

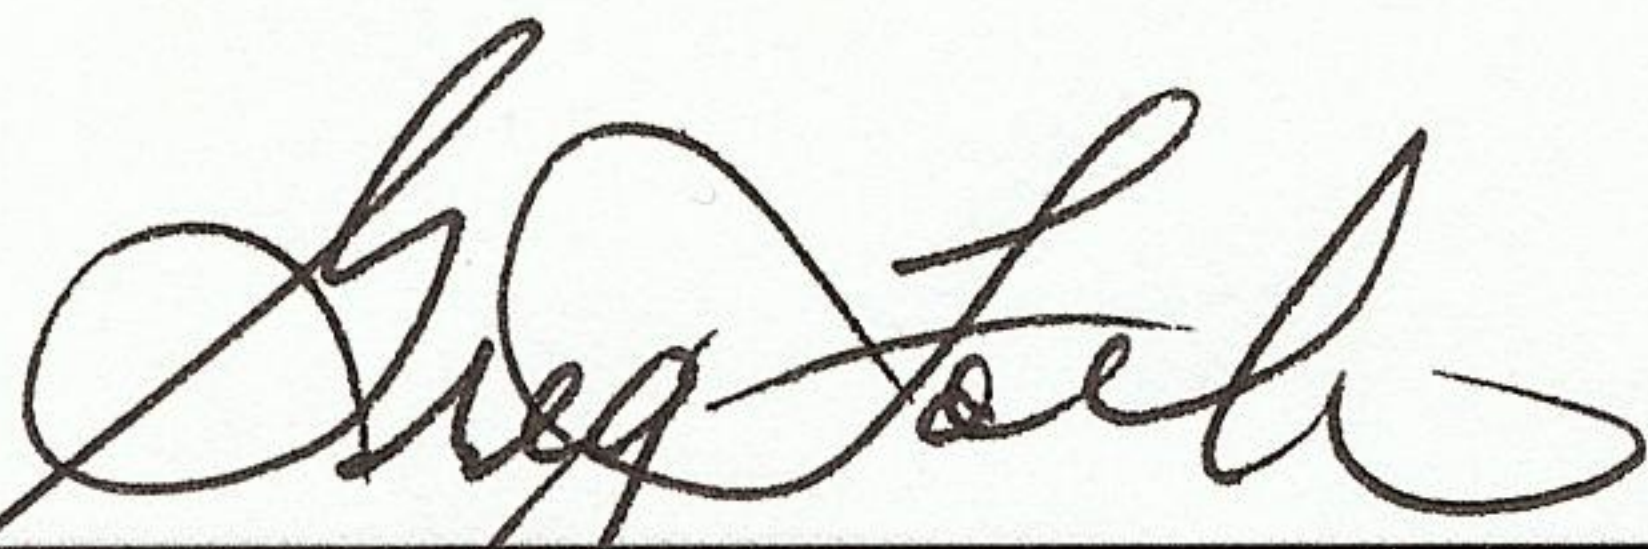

On April 1, 2007, Kinder Morgan Canada Inc. (KMC) achieved a significant milestone with the start-up of the Trans Mountain Pump Station Expansion project. The project was the culmination of a considerable effort by KMC, with assistance provided by the contractors and consultants employed on the project.

The project has proven to be successful on a number of fronts; firstly achieving the schedule milestone of April 1st, under what would be considered adverse and extreme winter conditions. Secondly, post start-up, the project has achieved the name plate hydraulic capacity of 260,000 bbls per day in every month of operation. The successful completion and startup of the project is again a testament to the effort and quality of personnel employed on the project.

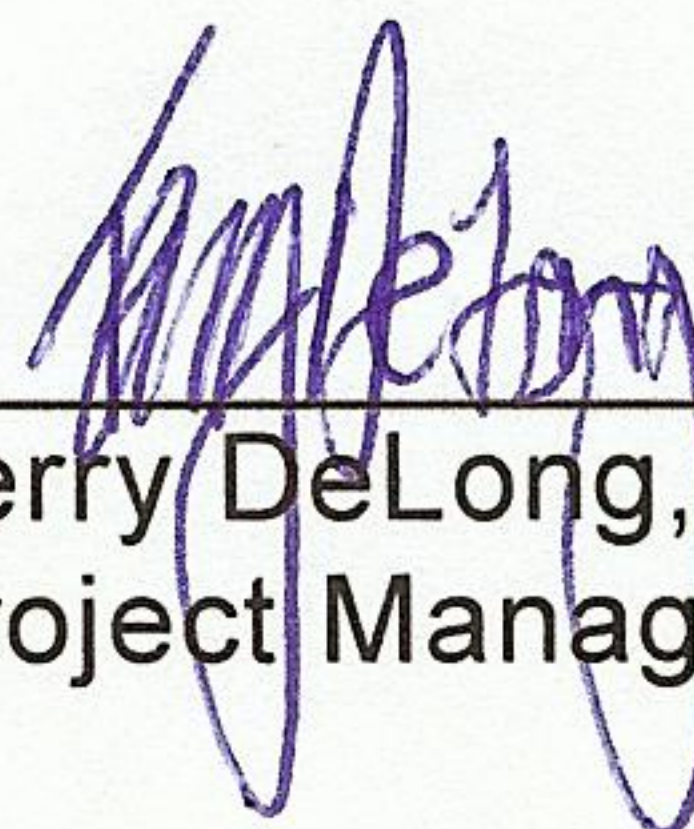

On behalf of KMC and the TMPSE Project team, we would like to thank Current Solutions Inc. for your contribution to the overall success of the TMPSE project.

Regards,

Kinder Morgan Canada Inc.

Greg Toth, P. Eng.
Project Director, TMX

Terry DeLong, P. Eng.
Project Manager, Facilities
